Ninth Symposium on Biologic Scaffolds for Regenerative Medicine

Day 1: April 28, 2016 (Thursday)

6:00 – 8:00 pm	Registration	Silverado East Foyer		
	Reception	Fairway Deck		
Day 2: Anr	il 29, 2016 (Friday)			
Day 2. Apr	11 23, 2010 (1 Hday)			
7:00 – 8:00 am	Breakfast	Fairway Deck		
Welcome				
8:00 – 8:05 am	Stephen F. Badylak, DVM, PhD, MD University of Pittsburgh	Silverado East		
Keynote Address				
8:05 – 8:40 am	Robert M. Nerem, PhD Georgia Institute of Technology	Regenerative Medicine: Harnessing the Power of the Intrinsic Human Biology		
Session I: Biologic Scaffold for Cardiac Reconstruction Chair: TBD				
8:40 – 9:05 am	Frederick J. Schoen, MD, PhD Brigham and Women's Hospital and Harvard Medical School	Role of matrix and cell dynamics in heart valve health and disease		
9:05 – 9:25 am	Robert Matheny, MD FACS CorMatrix Cardiovascular, Inc.	Development of a SIS Regenerative Heart Valve; From Benchtop to Clinical Trial		
9:25 – 9:45 am	Dan T. Simionescu, Ph.D.	Development of chemically stabilized acellular cardiac valve scaffolds and in vivo testing in a sheep right ventricular outflow tract model		
9:45 – 10:05 am	Allan S. Stewart, MD Mount Sinai Health System	The evolution of intra-cardiac biologic scaffolds: where have we been and where are we going		
10:05 – 10:25 am	Lauren D. Black III	Acellular Cardiac Extracellular Matrix-Silk Patches for Cardiac Repair post-Myocardial Infarction		
40.05 40.45	Devel	Filtra Bod		
10:25 – 10:45 am Break Fairway Deck Session II: Biologic Scaffolds for Plastic and Reconstructive Surgery				
	nair: TBD	Metabolic end products of absorbable		
10:45 – 11:05 am	Robert G. Martindale, MD, PhD Oregon Health & Science University	bioscaffolds in soft tissue repair; are they helping or hurting us?		
11:05 – 11:25 am	Anders Sandin	Use of Biodesign® after chest wall resection in children: - Our experience in two cases		
_11:25 – 11:45 am	Adam Young	The Use of Urinary Bladder Matrix for Body Wall Repair in Multiple Preclinical Models		
11:45 – 12:05 pm	Nicholas C. Pashos	Characterization of a Biologically Derived Graft for Nipple-Areolar Complex Reconstruction		
12:05 – 12:25 pm	Jenna Dziki	Biologic Scaffold Treatment for Volumetric Muscle Loss: Results of a Thirteen Patient Cohort Study		

	TBD Biologic Scaffolds for TBD	
Session III:	Chair: TBD	
1:45 2:05 pm	Karan I. Christman	Mechanisms of action of a myocardial matrix hydrogel for treating myocardial infarction
1:45 – 2:05 pm	Karen L. Christman	
2:05 – 2:25 pm	Inkyung Kang	A Role for Versican in Engineered Tissu Modulating Elasticity and Inflammation
2:25 – 2:45 pm	David M. Adelman, MD PhD FACS	Defining the Device to Tissue Transition Fetal Bovine Acellular Dermal Matrix
2:45 – 3:05 pm	George Hussey	A novel bioactive component of biologic scaffolds: Implications for tissue repair a regeneration
3:05 – 3:25 pm	Break	Fairway Deck
Session IV:	Biologic Scaffolds for TBD Chair: TBD	
3:25 – 3:45 pm	Jeffrey A. Hubbell, PhD Swiss Federal Institute of Technology, EPFL	TBD
	Cyrus Ghajar, PhD Fred Hutchinson Cancer Research	Where the Wild Things Are: Perivascula regulation of disseminated tumor cell
3:45 – 4:05 pm	Center	dormancy and chemoresistance.
4:05 – 4:25 pm	Matthew T. Wolf	Urinary Bladder Extracellular Matrix Inhi Tumor Formation
4:25 – 4:45 pm	Arnold I. Caplan, PhD Case Western Reserve University	MSCs: how they work and why(some surprises)
4:45 – 5:05 pm	Nikhil Gheewala, PhD	Developing a standard approach to evaluating the decellularization of biomaterial ECMs
5:05 pm	Adjourn	
6:30 – 7:15 pm	Poster Session & Wine Reception	Fairway Deck
7:15 – 8:00 pm	Entertainment	Fairway Deck
Day 3: A	pril 30, 2016 (Saturday)	
7:00 – 8:00 am	Breakfast	Fairway Deck
Welcome	Dioditable	i all way Dook
8:00 – 8:05 am	Stephen F. Badylak, DVM, PhD, MD University of Pittsburgh	Silverado East
Keynote Addre	ess	
8:05 – 8:40 am	Laura E Niklason, MD, PhD Yale University	The Agony and the Ecstasy of Getting in the Clinic
SACCION VI	BD chair: Bryan N. Brown, PhD <i>University of P</i>	
8:40 – 9:05 am	Nadia Rosenthal, PhD Monash University, Australia	Macrophages to the Rescue in Tissue Regeneration
5. 15 0.00 uill		

9:05 – 9:30 am	Jeffrey M. Davidson, PhD Vanderbilt University	TBD
	C. James Kirkpatrick MD, PhD, DSc,	
	FRCPath	
	Johannes Gutenberg University, Germany & University of Gothenburg,	Developing in vitro & in vivo models to study
9:30 – 9:55 am	Sweden	tissue reactions to biologic scaffolds
0.00 0.00 um	owodon.	tioodo rodotiono to biologio codiroldo
9:55 – 10:30 am	Break	Fairway Deck
	ole of the Macrophage in Bioscaffold In hair: Charles D. Mills, PhD (<i>BioMedical</i> (
	Chance 2. Imme, 1 112 (Bremeureur	Macrophages. The Chicken and the Egg in
	Charles D. Mills, PhD	Immune Responses to Injury or Biologic
10:30 – 10:50 am	BioMedical Consultants	Scaffolds
		Th2 T cells are required for extracellular
40.40 44.00	Kaish as Castala	matrix-mediated functional muscle
10:40 – 11:00 am	Kaitlyn Sadtler	regeneration Macrophage phonetype profile regulated by
		Macrophage phenotype profile regulated by tissue matrices for Screening of
11:00 – 11:20 am	Hui Li	Biomaterials
		Effect of Source Animal Age upon
11:20 – 11:40 am	Samuel T. LoPresti	Macrophage Response to ECM Scaffolds
		Regulation of macrophage function by
11:40 – 12:00 pm	Wendy F. Liu	engineered biopolymer scaffolds
	Lunch	Fairway Deck
Session VII: Bi	ologic Scaffolds for CNS, Whole Orga	•
Session VII: Bi		
Session VII: Bi	ologic Scaffolds for CNS, Whole Orga	•
Session VII: Bi	ologic Scaffolds for CNS, Whole Orga hair:	n, Skin, and Cartilage Reconstruction TBD
Session VII: Bi	ologic Scaffolds for CNS, Whole Organiair: Kristen Jones, MD	TBD Decellularized Allogeneic Neurovascular
Session VII: Bi	ologic Scaffolds for CNS, Whole Organiair: Kristen Jones, MD	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and
Session VII: Bi	ologic Scaffolds for CNS, Whole Organiair: Kristen Jones, MD	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in
Session VII: Bi	ologic Scaffolds for CNS, Whole Organiair: Kristen Jones, MD	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and
Session VII: Bi CI 1:20 – 1:40 pm	ologic Scaffolds for CNS, Whole Organiair: Kristen Jones, MD	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues
Session VII: Bi CI 1:20 – 1:40 pm	ologic Scaffolds for CNS, Whole Organiair: Kristen Jones, MD University of Minnesota	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant
Session VII: Bi CI 1:20 – 1:40 pm	ologic Scaffolds for CNS, Whole Organiair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo
Session VII: Bi CI 1:20 – 1:40 pm	ologic Scaffolds for CNS, Whole Organiair: Kristen Jones, MD University of Minnesota	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm	ologic Scaffolds for CNS, Whole Organair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm	ologic Scaffolds for CNS, Whole Organiair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm	ologic Scaffolds for CNS, Whole Organair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells Application of bioartificial dermal
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm	ologic Scaffolds for CNS, Whole Organair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm	ologic Scaffolds for CNS, Whole Organair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD Karthikeyan Narayanan	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells Application of bioartificial dermal regeneration templates for skin restoration in combat casualty injuries Biomembrane from porcine cartilage
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm	ologic Scaffolds for CNS, Whole Organair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD Karthikeyan Narayanan	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells Application of bioartificial dermal regeneration templates for skin restoration in combat casualty injuries Biomembrane from porcine cartilage extracellular matrix contributes
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm	ologic Scaffolds for CNS, Whole Organair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD Karthikeyan Narayanan	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells Application of bioartificial dermal regeneration templates for skin restoration in combat casualty injuries Biomembrane from porcine cartilage extracellular matrix contributes enhancement of efficacy of Microfracture fo
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm 2:20 – 2:40 pm	inair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD Karthikeyan Narayanan Ian L. Valerio, MD, MS, MBA	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells Application of bioartificial dermal regeneration templates for skin restoration in combat casualty injuries Biomembrane from porcine cartilage extracellular matrix contributes enhancement of efficacy of Microfracture fo cartilage repair- Clinical results followed up
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm 2:20 – 2:40 pm	ologic Scaffolds for CNS, Whole Organair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD Karthikeyan Narayanan	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells Application of bioartificial dermal regeneration templates for skin restoration in combat casualty injuries Biomembrane from porcine cartilage extracellular matrix contributes enhancement of efficacy of Microfracture fo
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm 2:20 – 2:40 pm 2:40 – 3:00 pm	inair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD Karthikeyan Narayanan Ian L. Valerio, MD, MS, MBA	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells Application of bioartificial dermal regeneration templates for skin restoration in combat casualty injuries Biomembrane from porcine cartilage extracellular matrix contributes enhancement of efficacy of Microfracture fo cartilage repair- Clinical results followed up
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm 2:20 – 2:40 pm 2:40 – 3:00 pm 3:00 – 3:20 pm 3:20 – 3:45 pm Session VIII:	ologic Scaffolds for CNS, Whole Organair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD Karthikeyan Narayanan Ian L. Valerio, MD, MS, MBA Byoung-Hyun Min, MD, PhD Break BD	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells Application of bioartificial dermal regeneration templates for skin restoration in combat casualty injuries Biomembrane from porcine cartilage extracellular matrix contributes enhancement of efficacy of Microfracture fo cartilage repair- Clinical results followed up 1 year postoperatively
Session VII: Bi CI 1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm 2:20 – 2:40 pm 2:40 – 3:00 pm 3:00 – 3:20 pm 3:20 – 3:45 pm Session VIII:	inair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD Karthikeyan Narayanan Ian L. Valerio, MD, MS, MBA Byoung-Hyun Min, MD, PhD Break	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells Application of bioartificial dermal regeneration templates for skin restoration in combat casualty injuries Biomembrane from porcine cartilage extracellular matrix contributes enhancement of efficacy of Microfracture fo cartilage repair- Clinical results followed up 1 year postoperatively Fairway Deck
1:20 – 1:40 pm 1:40 – 2:00 pm 2:00 – 2:20 pm 2:20 – 2:40 pm 2:40 – 3:00 pm 3:00 – 3:20 pm 3:20 – 3:45 pm	ologic Scaffolds for CNS, Whole Organair: Kristen Jones, MD University of Minnesota Hilton Kaplan MBBCh FCSSA PhD Jeff Ross, PhD Karthikeyan Narayanan Ian L. Valerio, MD, MS, MBA Byoung-Hyun Min, MD, PhD Break BD	TBD Decellularized Allogeneic Neurovascular Bundles for Reinnervation and Revascularization in Soft and Hard Tissue Reconstruction, the Rehabilitation of Massive Scarring, and Engineered Tissues Engineering a Clinically Relevant Transplantable Liver with Sustained In-Vivo Perfusion Decellularized organs: Whole organ construction with stem cells Application of bioartificial dermal regeneration templates for skin restoration in combat casualty injuries Biomembrane from porcine cartilage extracellular matrix contributes enhancement of efficacy of Microfracture fo cartilage repair- Clinical results followed up 1 year postoperatively

4:05 – 4:25 pm	Inna Kornienko	Low-immunogenic matrix suitable for transplantation
		Extracellular Matrix-based Device for
		Reconstruction of the Temporomandibular
4:25 – 4:50 pm	Bryan N. Brown, PhD	Joint Meniscus
	Stephen F. Badylak, DVM, PhD, MD	
4:50 - 5:00 pm	University of Pittsburgh	Closing Remarks & Adjourn

VERSION 6 (21-JAN-2016)
