

Application Deadlines:

Applications for the 2017 Regenerative Medicine Summer School Will be accepted starting December 1, 2016. The deadline for submitting the application and all required documentation is April 1, 2017. Applicants will be notified (via email) if they are selected as a final candidate. At that time, additional information and forms will be required to complete the application process. Final admission decisions will be made by April 15, 2017, and accepted students will be notified by letter.

Applications and instructions can be found at <http://www.mirm.pitt.edu/professional-development/summer-school/>

The McGowan Institute's Mission Statement

- To establish a national center of expertise in regenerative medicine focused on developing and delivering therapies that reestablish tissue and organ function impaired by disease, trauma or congenital abnormalities.
- To foster the generation of scientific knowledge in regenerative medicine and to share that knowledge with researchers, clinicians and the public through educational activities, training and publications.
- To educate and train scientists and engineers to pursue technologies related to regenerative medicine, and train a generation of clinicians in the implementation of regenerative therapies.
- To support the commercialization of technologies in regenerative medicine and thereby accelerate the translation of research discoveries to clinical implementation and patient benefit.
